

Tumblr Theme Final

by Casey Judge

In designing a tumblr theme I knew it needed to feature cats, because everyone loves cats. So I initially thought I'd design a minimalistic scrolling theme that featured lasercats all over the entire page. I then decided that I did not want to photoshop 300 lasercats, and also realized that I should probably use my own images. So, I took an image of a black cats' eyes I had stored on my phone, and made a design that featured the fixed-scroll I wanted with the new, simplistic images of a pair of green eyes. Midway through building said design, however, I took a snapchat of my cat perfectly devouring my arm, and redesigned the entire theme to feature that (admittedly low-quality) image, where the cat is eating tumblr posts as one scrolls down the page. The internet at its finest.

above banner will be
filled with even more
lasercats -->

Mar 12 2014 [What Is the Size of Earth Compared to the Universe?](#)
0 notes

The Universe is not only immaculately expansive but is also immeasurably compressed, so when comparing anything to the size of the Universe, you must consider not only the large scale but also the microscopic scale of space. First of all, you should know how large the Earth is compared to a...
