➖ Looking For Webdev To Drive Insane With Impossible Requests

Manhattan, NY

Hello there. This is where the explaination of my listing would go, if I had one. Instead, read my explaination of the explaination. That's meta. As it turns out, there's a lot more space to fill that I had previously thought. So my initial statement is invalid, as I will now create an explaination for this fake listing. Must know web design using C++ with embedded Ruby on Rails. Now make that text bigger. And green. Also, can you kinda just shift everything down? I mean, that should be easy right? Oh, it isn't? Well, I mean, could you please? The rest of us agree that it would look a lot better moved down. Thaaaaaaaanks.
